

The screenshot shows the Windows Task Manager Performance tab. The left sidebar lists various system metrics: CPU, Memory, Disk, Network, GPU, Storage, and Sound. The main area displays the 'Memory' section, which shows that 16.0 GB of RAM is installed, with 1.0 GB currently in use (6.2% usage). Below this, a 'Memory usage over time' graph is visible, showing a peak in usage around 10:00 AM. The bottom of the window shows the Windows taskbar with the Start button and several open applications.
